

UFP-Edge Primed Trim and Fascia

Primed for great performance.

UFP-Edge sets the bar high for primed trim and fascia. You won't find a higher quality primed product line on the market. With UFP-Edge, expect a sanded and primed board that's ready for a smooth, appealing finish.

Our UFP-Edge factory-applied machine coat primer covers all six sides of the board to ensure protection and long-term performance, indoors or outside in the elements. In the end, our finishing system ensures consistent and even coverage of primer and prepares the wood for a great topcoat finish.

We don't stop there. Our UFP-Edge prefinishing facilities are also capable of offering a variety of primed pattern boards like shiplap and tongue and groove.

UFP-Edge primed products use a variety of coatings with low VOC to help reduce the impact on the environment. Our advanced prefinishing equipment also allows us to coat a variety of substrates with unique finishes for nearly any application. Throughout our process, we check materials for defects and quality to make sure the finished surface is simply the best. If you're looking for a great finish, start your project with UFP-Edge.

UFP-Edge True

UFP-Edge True is the premier exterior wood trim product in the market! Each trim board is finger-jointed, edge-glued and primed for superior stability and lasting performance. These boards are knot free, which offers the ultimate in appearance. UFP-Edge True's first primer coat is an absorbing tannin blocker, while the second coat is fortified using a durable, non-blocking PPG acrylic primer, which prepares the surface on all sides for a superior finish.

Features

- Knot-free Japanese cedar naturally resists decay and termites
- Finger-jointed and edge-glued for superior stability
- Two-sided board (smooth/resawn) sanded between coats on the smooth side to give you the best surface
- Factory-applied coating (Machine-Applied Coatings®) enhanced with a mildewcide to help deter mildew
- Coated on all sides for ultimate protection
- 25-year warranty against peeling, flaking and chalking
- 1x3-1x6 and 2x4-2x12 in 16 ft and 20 ft lengths

Premium Primed

Premium Primed trim and fascia is made from knot-free finger-jointed radiata pine and is available in a reversible profile (S1S2E). Both faces offer a unique textured appearance, creating an attractive exterior accent. Each board is primed and ready for a custom topcoat of exterior paint. 1X and 2X boards are available in a variety of lengths.

Features

- Clear, knot-free radiata pine provides long-term performance
- Finger-jointed and edge-glued for superior stability
- Two-sided board surface: S1S2E (resawn/smooth)
- Factory-applied coating enhanced with a mildewcide to help deter mildew
- Coated on all sides for ultimate protection
- 1x3-1x6 and 2x4-2x12 in 16 ft and 20 ft lengths

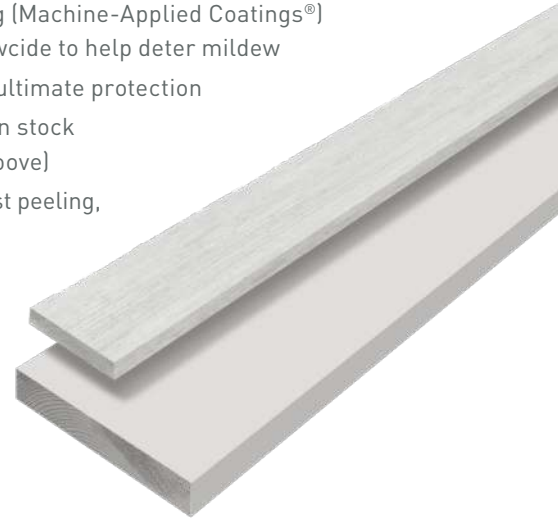

Primed SPF

Edge Primed SPF trim and fascia boards start with J Grade and Appearance Grade SPF raw lumber, machined and primed to perform in virtually any weather condition. Available in S1S2E resawn or combed finish and S4S, both faces offer a unique textured appearance, creating an attractive exterior accent. 1X and 2X boards are available in a variety of lengths and are primed and ready for a custom topcoat of exterior paint.

Features

- SPF wood is kiln dried, stable and ready for paint
- Economical choice for interior/exterior fascia and trim
- Smooth, resawn and combed surface options
- Factory-applied coating (Machine-Applied Coatings®) enhanced with a mildewcide to help deter mildew
- Coated on all sides for ultimate protection
- Also available in pattern stock (shiplap/tongue and groove)
- 15-year warranty against peeling, flaking and chalking
- 1x3-1x6 and 2x4-2x12 in a variety of lengths
